You should remember that past performance is not a guide to the future. The price of investments and the income from them may go down as well as up and you may not get back the full amount invested. Investment in emerging markets may involve a higher element of risk due to political and economic instability and underdeveloped markets and systems. Investments in smaller companies may involve a higher degree of risk as markets are usually more sensitive to price movements. Exchange rate changes may cause the value of underlying overseas investments to go down or up. The value of property assets is a matter of valuer's opinion, not fact. These assets may be more difficult to realise and may not be realisable at all. The level of tax benefits and liabilities will depend on individual circumstances and may change in the future.

Save & Prosper Pensions Limited is authorised and regulated by the Financial Services Authority.
